

Smarter way to organize your invoices.

SMART TRUCKER

The Concept

Smart Trucker is an innovative app that simplifies the process of scanning, emailing, invoicing, and organizing documents at the ease of your fingertips. Now, say goodbye to the paperwork and start with the hassle-free way of managing your work.

Client's Vision

Empowered client's vision with robust solutions.

The client was really excited about the idea of this smart app. The main aim of the app is to make the invoicing process easy and fast. **To fulfill this vision, we built an app that is loaded with features like - scanning, adding contacts, creating and managing invoices, and a lot more.**

How Softuvo Helped In Achieving Client Goals?

A unique business vision requires out-of-the-box creativity, and we direct the clients in the right direction to fulfill their business wishes.

Here is how we carried the journey of the Smart Trucker.

Planning

Soon after the client shared his requirements, we started jotting out points that can help us create the right path to achieve the client's vision. We curated an action plan that focussed on covering all aspects of the app requirements. By following an agile methodology, we took over all the tasks and made sure that everything was covered in the process.

Design

Designs are the game-changers for the app. The concept of Smart Trucker was unique and included several features. By using the latest tools, we crafted a splendid layout that perfectly highlighted all the features of the app. The app was designed seamless making

Development

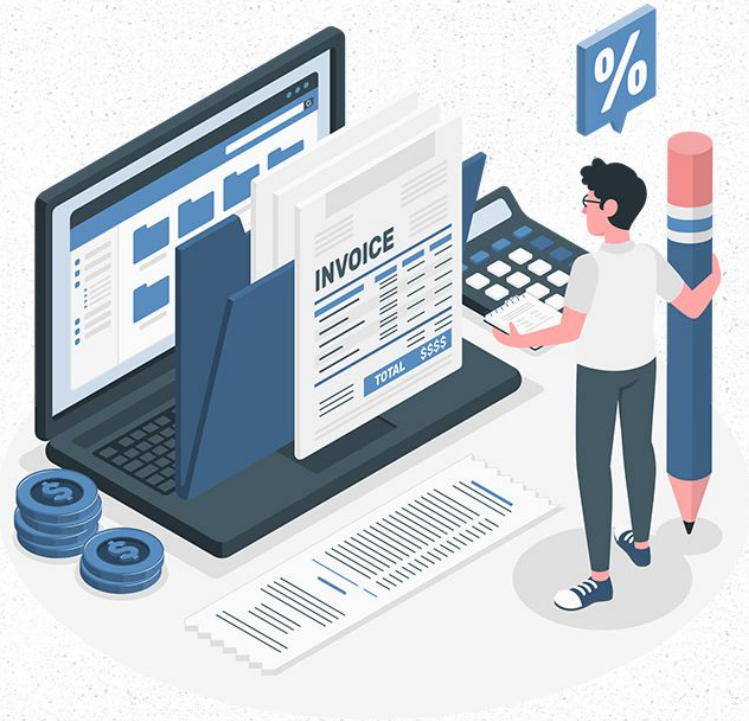

The development process was intense but the team did really well in the development process. We used Flutter for creating robust iOS and Android apps. From implementing the designs to launching the app on the app store, there were several aspects that needed to be covered. The team did really well in meeting the client's expectations.

Testing

All our app developments go through an intensive testing process. By using high-tech testing tools, we followed a series of testing processes. The whole process of testing ensured the app launched bug-free. Ultimately the client got an app that worked flawlessly on both iOS and Android platforms.

Key Challenges We Faced

Creating an app involves several stages and every client has their own unique vision for the project. Although there were no complex challenges in the project, ensuring a smooth workflow was daunting at all times. Streamlining the tasks, coordinating between the teams, ensuring all stages of app development, was challenging but overcame all the hurdles and delivered the project successfully.

The Result

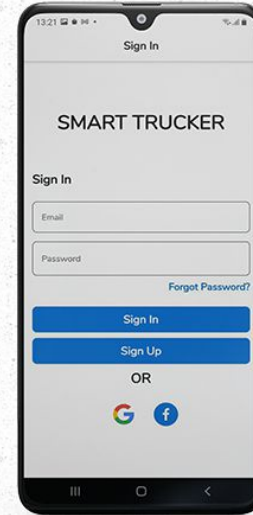

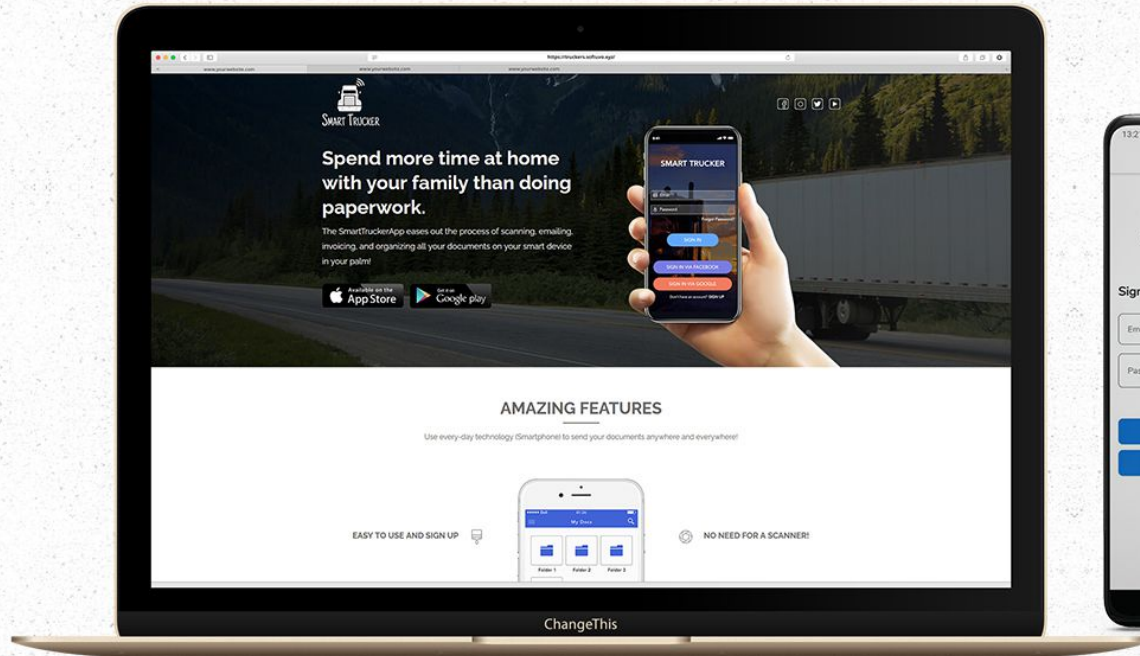

When results are satisfying all you get is appreciation.

The whole concept of Smart Trucker was to create a platform that eases down the invoicing processes. We feel glad that we successfully helped the client in achieving his business
