

THELOTTERYLAB

Help me win the Lottery!

This request from friends and coworkers spurred the development of The Lottery Lab. This unique platform was founded in 2017 with the sole motive of helping people understand the lottery better.

Technology Stack

Laravel

Goals

01

Access To Relevant Lottery Information

The Lottery Lab formalizes the information about lotteries played across the U.S. so that even the minutest detail was clear for players.

02

Lottery Analytics and Tools

The client wished to incorporate lottery analytics tools so that users could understand the true potential of increasing their odds of winning.

03

Strategic Betting On Lottery Numbers

The Lottery Lab comprises tools and techniques that let players understand lottery systems better.

04

Appropriate Lottery Particulars

He envisioned a website that provided users with useful blogs and articles concerning winning and losing stories, informative content on lotteries, educated them about scams, and applicable taxes.

05

Easy To Navigate UI

With so much to offer the client wished a really easy to navigate UI for its users.

Challenges

Delivering a feature-rich and quality assured project was as difficult as a river flowing from a mountain with rock hurdles, but our strategies crossed them all and delivered the project in the best way possible.

01

Incorporation Of Lottery Data

One of the biggest challenges faced by developers was incorporating complete lottery data which included past lottery results required for the tools to function properly.

02

Tools Integration

The tools were based on statistical methodologies and were designed to function in four different ways. All of this required sophisticated mathematical calculations.

03

Virtual Platform

In order to meet our client's requirement for a lottery simulation, we had to offer the users a real-time experience of playing their favorite lotteries.

04

Calculations For Taxes

The client wanted to incorporate a tax calculator which would calculate all the taxes as per the U.S Laws by just entering the winning amount.

Achievements

The final product not only helped the client showcase his idea in the best way but also helped him drive more traffic. He was more than happy with the positive results that the site ensured.

Lottery Tools

As per the client's recommendations, the lottery tools now consist of Frequency Analysis, Tightness Test, Transition Matrix, and Lottery Wheel.

Incorporation Of State and Multi-State Lotteries Data

The Lottery Lab has worked on incorporating the multi-state and state lotteries played in the U.S.

Lottery Results

The Lottery Lab provides its users with the latest as well as past winning numbers, with just one click.

Lottery Simulation Tool

A virtual platform wherein the users can have a real-time experience of playing their favorite lotteries.

Number Checker

The Number Checker allows the users to fill in their desired numbers and check whether these numbers have been the winning digits or not.

Lottery Tax Calculator

This calculates the taxes on the amount entered as per the U.S. state laws for every different state.

Lottery Blogs and News

This page comprises all information and news with respect to lotteries played all over the U.S.

Easy To Navigate UI

The website has a simple and easy to navigate UI, which acts as an added advantage for us as well as our users.

**Softuvo Solutions has been a building block for
The Lottery Lab and has propagated the brand
name worldwide!**
